A spray of the New French Hybrid Lilac Pres. Fallieres (one-third less than nat. size). Strong 18 to 24 inch plants

\$4 each

by express f. o. b. Weiser Park.

New French Hybrid Lilacs

French Hybrid Lilacs are far superior to common Lilacs. They bloom at an earlier age, in greater profusion, and with much larger trusses. Neither do they demand more care or space than the ordinary Lilacs.

The original Farr collection of nearly 200 varieties has been thoroughly studied, and propagation is now concentrated on the "best fifty." The plants are from 1½ to 2 feet high, strong and bushy, have already bloomed, and are guaranteed true to name.

Better Plants by Farr

Our catalogue for the new year, will tell you about French Lilacs, the varieties we grow and their value. In addition to Lilacs, select group of Iris, hardy Chrysanthemums, Delphiniums, and Tree Peonies are presented. We shall be glad to send a copy of this booklet to all who are interested in Better Plants.
